How to make the PVC Targeting device

What you'll need (makes 1)
1 – Length of ½” PVC pipe (available home improvement stores 10-foot lengths)
2 – ½” 90° Elbow couplings (non-threaded)
2 – ½” Tee couplings (non-threaded)
2 – ½” 90° Spigot couplings (non-threaded)
2 – ½” End caps (non-threaded)
2 – ½” Center couplings (non-threaded)
4 – Felt strips 14” long X 2” wide
Cardboard paper strips cut to 10 ½” long X 1 ½” wide
Industrial strength adhesive Velcro, PVC pipe cutter

Cut the 10-foot PVC pipe as follows
3 – 19” lengths
2 – 9” lengths
2 – 7” lengths

Steps:

1. Cut the 10-foot PVC pipe as follows:
   - 3 lengths of 19”
   - 2 lengths of 9”
   - 2 lengths of 7”

2. Apply 2” wide X 2.75” long Velcro to the top of the center coupling.

3. Pin two pieces of felt together, sew ¼” seam around edge leaving one end open. Insert cardboard strip and sew end closed; also stitch above the piece of cardboard. Place loop Velcro on the top. Repeat for second flag, now flags are ready to hang on the bar.

4. Leave end open, insert cardboard and stitch the end closed and above the cardboard piece on top.

5. Apply sticky back Velcro (loop side) 2” wide X 2.75” long.
